### Attack Resistant Glass Solutions

**BanditShield®** has been specifically developed to resist manual attack and delay access to protected areas such as jewellery stores where items of high value can be easily accessed. Unlike standard laminated glass, the **BanditShield** Anti-Bandit Glass does not fall away when broken, preventing access. With the **BanditShield** range, the bonded glass and laminate make it challenging and time consuming to smash through. The laminate holds on to the broken layers of glass making separation a difficult process.
